#### †Method Detection Limit (MDL):

In microbiological testing, this is the minimum level of growth that can be detected with confidence. If a result is reported as "None Detected", it means any visible growth was below this limit.

Results

| Analysis | Method | †MDL / LOQ | Specification | Results | UOM | Lab ID |
|----------|--------|------------|---------------|---------|-----|--------|
|----------|--------|------------|---------------|---------|-----|--------|

†Limit of Quantitation (LOQ):

In analytical chemistry testing, this is the minimum level of the desired analyte that can be quantified with confidence. If a result is reported as less than LOQ, it means any detected amount was too small to report an exact number.
